Florida Oral Health Alliance Result: All Florida children, youth and families have good oral health and well-being, especially those that are vulnerable.

Headline Indicator #1: Percentage of eligible Medicaid children ages 0-20 receiving any dental services
Headline Indicator #2: Percentage of eligible Medicaid children ages 1-20 receiving any preventive dental services

Meeting Results:
By the end of the meeting participants will have:
- Discussed emerging issues in oral health with a focus on the use of silver diamine fluoride
- Received an update on the Florida Oral Health Alliance Medical/Dental Integration (MDI) pilot
- Received an update on Florida Oral Health Alignment Network activities
- Learned about innovative ways to utilize Geographic Information Systems (GIS) to map oral health care gaps and target interventions
- Reviewed proposed structure for Florida Oral Health Alliance subcommittees and discussed next steps

Emerging Issues in Oral Health: Silver Diamine Fluoride
What strategies are in place to communicate about SDF to providers, patients and parents?
- DentaQuest and the American Dental Association (ADA) have hosted webinars for providers
- Under the Managed Medical Assistance (MMA) program, communication to members goes through the health plan
- More guidance is needed on how to get the word out to the community
  - Hot-spotting may be a way to map out where targeted education is needed

Update on Medical/Dental Integration Pilot Project
- The next 2-3 months will be used to develop a business plan to demonstrate sustainability and an implementation plan for the pilot project in Miami Dade and Palm Beach Counties
- FIHI will be exploring how to use the model to integrate medical/dental information through Epic (EMR that has a new dental module)
- FIHI MDI Advisory Group is currently made up of:
  - Cesar Sabates, DDS, PA (Miami-Dade County)
  - Phillip Bilger, DDS (Palm Beach County)
  - Tommy Schechtman, MD, MSPH, FAAP (Palm Beach County)
  - Patricia Braun, MD (Colorado)
  - Members of the FDHA, FDA and Florida Board of Dentistry
Questions/comments:
  o Who is the rendering provider vs. billing provider?
  o How will the hygienist be reimbursed? How will the DH be integrated into the workflow of the medical practice?
    ▪ These questions will be documented in a case report to develop a replicable model
    ▪ FIHI will be working with the DentaQuest Institute and a practice management consultant
  o Tracking insured vs. uninsured children (FL Healthy Kids would like to support identifying uninsured children)

Update on Florida Oral Health Alignment Network Activities

  ● Currently working to expand and diversify the network (20 priority organizations)
    o United Way of Florida is the first signer of letter of support; will be collaborating with the network to integrate oral health into school resources
    o Faith-based organizations have been engaged, including African American congregations. 3 training sessions are planned throughout Florida with 20-25 faith leaders
  ● Additional partnership opportunities discussed:
    o United Way of Florida Children’s Week Events, January 2018; Tallahassee (opportunity to engage with community and legislators)
    o FL Healthy Kids interested in partnering on engaging faith-based leaders (currently has a faith-based ambassadors program and working on messaging around dental care)
  ● Oral Health Florida Conference planned for 2018; check website for updates

Using Geographic Information Systems (GIS) to Target Oral Health Interventions

  ● GIS allows health plans to focus in on members who have care gaps (members with diabetes, members who have not received a health screening, or those not making use of dental services).
  ● Provides the ability to find members that have not gone to the dentist in the past year or children that have not participated in a school-based sealant program
  ● GIS can be used to support an outreach campaign and plan events:
    o Data layers can be combined, queried, to yield targeted results (i.e. Spanish Speaking; Needs Well Child Exam; Within 1 Mile Radius of Target Location)
  ● Data sources used:
    o Analysis of overall member/community demographics
    o Analysis of member clinical gaps in care and non-clinical barriers to care
    o Analysis of provider network across service area
    o Planning Health Promotion Outreach (Mail/Phone) Campaigns
    o Planning Targeted Community-level Clinic Day Events
    o Community Partner/Provider Selection (Churches, Schools, CBOs, FBOs)
  ● Questions/comments:
    o Opportunity to use GIS and hot-spotting to identify vulnerable communities and high-needs areas in order to target oral health interventions (dental care access, caries reduction, SDF education, etc.)
Florida Oral Health Alliance Subcommittee Discussion and Next Steps

Involvement to include participation in subcommittee calls (frequency determined by subcommittee) and determining how to best organize the group to get closer to proposed deliverables (subcommittee members can determine what deliverables are achievable by the group).

Confirmed participation in subcommittees (updated from 10/19 meeting):

Oral Health Hot-Spotting/Integrating multi-sector oral health data:
- Dr. Philippe Bilger, Florida Department of Health
- Dr. Doug Manning, DentaQuest
- Socrates Aguayo, Anthem
- Nancy Sawyer, Oral Health Florida Data Action Team

Communications/Messaging:
- Carrie Hepburn/Christina Barrett, Tampa Bay Healthcare Collaborative
- Scott Darius, Florida Voices for Health
- Deborah Foote, Oral Health Florida
- Jena Grignon/Joe Davis, Florida Healthy Kids Corporation

Medical/Dental Integration:
- Dr. Philippe Bilger, Florida Department of Health
- Dr. Doug Manning, DentaQuest
- Karen Pesce Buckenheimer, Oral Health Florida Medical/Dental Action Team
